DETAILED ACTION

Drawings

1. The drawings are objected to because figure lines and numbering in many cases are not readable. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Figure 10 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct

any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Hardy et al (US 4,695,799).

As regards to claim 1, Hardy et al teach a method of excitation comprising adiabatically conditioning at least a portion of a body with a plurality of radio frequency pulses (figure 1, column 3 and 4, see also column 1 and 2 for brief summary).

Claims 2 and 3 are rejected as Hardy et al further teach application of sigmoidal radio frequency pulses about a ramp for adiabatic conditioning of the body (figure 1b, numerals 10a and 11).

Allowable Subject Matter

4. Claims 4-23 are allowed, as the prior art of record does not teach or suggest a magnetic resonance imaging system and a method, including an antennae exciting the body with a second plurality of radio frequency pulses in the presence of gradient field pulses, in combination with the remaining limitations of the claims.
